SSCI-42

OCA 86-3835

13 November 1986

## MEMORANDUM FOR THE RECORD

SUBJECT: Review of Arms Control Monitoring Requirements to Be Considered by the SSCI during the 100th Congress

1. George Tenet of the SSCI staff met with Agency officers on 10 November 1986 to discuss his ideas for presenting leading arms controls issues to Committee Members during the 100th Congress. Participating in the discussion were [redacted] of DI/ACIS; the meeting took place at SHOB 219 from 1600 to 1700 hours. The undersigned attended for OCA. 25X1

2. Discussion focused on arms control and intelligence collection/analysis support to U.S. policy-makers. Tenet is attempting to develop a format for the SSCI which addresses the issue differently from the past. He requested the meeting with ACIS to get its reaction to some of his ideas. His proposal would eventually lead to decisions by the SSCI on resources for arms control monitoring and treaty verification.

3. The Agency officers and Tenet agreed to develop several papers identifying the intelligence issues to be addressed -- templates reflecting the leading questions in arms control. These papers would be reviewed by the same individuals in a week's time. The group would meet periodically to exchange ideas on Tenet's approach. Director, ACIS, recommended various sources and programs, including the CBJB, for Tenet to study in drawing up his models. 25X1
